

Organic Advisory Services for Farmers and Growers

Statutory information is for guidance only and is correct at time of going to print

The organisations and companies listed overleaf offer consultancy services to farmers interested in converting to organic production, as well as those undergoing conversion or who are already organic.

The details given for each Advisor have been supplied by that Advisor. Please be aware that Advisors undertaking work resulting from the appearance of their name on this list, do so entirely in their individual capacities, negotiating their own terms and fees and in no sense representing OF&G. Inclusion in this list does not constitute a recommendation by OF&G. OF&G cannot accept any responsibility or liability.

For farmers who are considering converting to organic production and are not yet registered with a sector body, the Organic Conversion Information Scheme (**OCIS**) provide an initial half day, later followed by a full day of free advisory visits to the farm, with the aim of helping producers decide how to proceed into an organic system (This does not apply in Scotland). Telephone one of the following numbers to arrange your free visits.

England: 0800 980 0048
Wales: 01970 622100

Scotland: 01224 711072
Northern Ireland: 028 9442 6765

Notes on the advisor list

Speciality Indicates the advisor's areas of expertise.

Area Indicates the geographical area covered by the advisor.

Please see Technical Leaflet 107 *Sources of Permitted Fertilisers* for soil analysis services.

Further Information

For further information about conversion, certification, our standards and publications, please contact the OF&G office on 01939 291800 / 0845 330 5122
